 - 4. 自2018年，与韩国Daincube公司合作开发协作机器人控制器。控制器先进、稳定、安全、可靠，与TB6系列机械臂配套，具有良好的拖动试教、高灵敏度碰撞的优异特性。同时可支持末端六维力传感器或6关节单维力传感器控制。单控制器也可支持双臂控制，为客户进一步缩减体积，降低成本。
 - 5. 接受客户在公司标准的机器人关节与协作机器人的基础上，灵活定制客户所需要的结构、自由度、颜色，防护等级等各类需求。
- 1. Core competitiveness: Techservo has a strong and stable technical team with more than 10 years of experience in the development, production and application of high-performance DC servo systems. It's proficient at the advanced core control algorithms of servo drives, has completely independent intellectual property rights, and can meet customer OEM customization demand.
 - 2. Has more than 3 long-term cooperation companies, who are first-class domestic motor and absolute encoder R & D and production manufacturers, to meet customization and cost requirements.
 - 3. RJSII robotic joint module and TB6 series co-robot can meet the harsh use environment such as heavy load, wide arm span, high precision, large diameter of the middle through-line hole, high voltage electromagnetic environment, -40° low temperature, IP64 protection level and so on.
 - 4. Since 2018, we have cooperated with DAINCUBE Inc. (Korea) to develop co-robot controllers. The controller is advanced, stable, safe, and reliable. It is matched with the TB6 robotic arm, and has the excellent characteristics of good drag teaching and high sensitivity collision. At the same time, it can support the control of end six-dimensional force sensor or 6 joint single-dimensional force sensor. A single controller can also support dual-arm control, it can further reduce the size and cost for customers.
 - 5. On the basis of the company's standard robotic products, we can flexibly customize the structure, degree of freedom, color, protection level and other requirements of customers. quickly and cost-down.
